REVIEWED BY	Jared Ball / Ted Johnson

RECOMMENDATION:

Staff recommends that the SDCL 11-6-19 Review to allow the construction of a sign on public property be continued to the **September 4, 2008** Planning Commission meeting.

GENERAL COMMENTS: (Update: July 28, 2008. All revised and/or added text is shown in bold.) This item was continued at the July 24, 2008 Planning Commission meeting because the required Flood Plain Development Permit has not been obtained and the required revised site plan had not been submitted for review and approval. As of this writing the required information has not been submitted. Staff recommends that this item be continued to the September 4, 2008 Planning Commission meeting at the applicants request.

STAFF REPORT
August 7, 2008

No. 08SR017 - SDCL 11-6-19 Review to allow the construction of a sign on public property **ITEM 21**

This is a request by the City of Rapid City- Parks Division for approval to construct an identification sign on public land pursuant to the requirements of an 11-6-19 SDCL. The property is located in the Flood Hazard Zoning District at Roosevelt Park north of East Omaha street between North Maple Avenue and Waterloo Street. The applicant is proposing to construct an 8' x 4' identification sign that is 5 feet, 6 inches tall and reads "Welcome to Roosevelt Park".

STAFF REVIEW:

The applicant has submitted a site plan identifying the proposed sign location. The submitted site plan is not drawn to scale and does not identify other features on the property such as existing signs, utility locations, existing structures, and other features located on-site. Staff has concerns that utilities and irrigation lines may be potentially damaged during the installation of the proposed sign. Further, the sign may be located in a sight triangle. Staff recommends that the applicant submit a revised site plan that is drawn to scale and identifies all existing utilities, existing signs, existing structures, irrigation lines as well as any drainage/utility easements if applicable.

In addition, because of spacing requirements in regard to ground mounted signs the applicant's site plan must identify any existing signs located on the property. Furthermore, a detailed site plan drawn to scale is needed to ensure that the proper setback for the sign is being provided. A detailed site plan drawn to scale also is needed in order to determine the proposed sign's proximity to the federally designated flood plain.

Staff will recommend that the SDCL 11-6-19 Review to allow the construction of a sign on public property be continued to the September 4, 2008 Planning Commission Meeting at the applicants request.
