To: Vicki Fisher, Planning Manager – City of Rapid City
From: Claudia Murphy, Architectural technician

I have attached the application for the 11-6-19 Review for the proposed De-Icing Pad at Rapid City Regional Airport. This de-icing pad is part of the Fire Station project at the airport (which is in review process now).

This is a 4666 SF concrete pad to be installed at the edge of the airport apron to facilitate the de-icing equipment used by the airport. The pad is located within the AOA of the airport.

There will be no landscaping done in this area because it is located on the AOA side of the airport. Note: The master landscape plan shows excess landscaping points at this time.

I have attached a copy of an email that was sent to Karley Halsted from Todd Schultz here at TSP regarding the drainage at the pad/apron. At the time of this submittal, he has not had a response from Karley. I am assuming that the information provided in this email was sufficient.

I have also attached the legal description, a vicinity map and detail map, the zoning map, an 8½ x 11 of the concrete pad and concrete detail.
