Re: **Statement of Intent** to accompany SDCL §11-6-19 Review Application (copy attached)

Dear Vicki,

J&J Truck and Auto Body is currently hauling water to a cistern and disposing of sanitary sewer via an on-site sanitary sewer system which is failing. The area was recently annexed by the City of Rapid City.

The project will extend the existing municipal water distribution to allow a 6" water service connection from J&J Truck and Auto Body's facilities to the municipal water main.

The work involves construction of approximately 700' of 16" water main within the R.O.W, beginning at the existing 16" water main in Cambell street, extending east in the E. Philadelphia R.O.W.

Please feel free to call or e-mail if additional information is needed.

Sincerely,

Renner and Associates, LLC  
Mitchell B. Kertzman, PE
