

**Western Dakota Tech  
LED Sign Project  
Statement of Purpose**

Western Dakota Tech proposes replacing its current marquee sign with a LED sign in the same location. The project would entail using the existing sign pole and replacing the upper message center.

The sign is located at the intersection of East Highway 44 and Mickelson Drive, the main entrance to the WDT campus. The LED message center would be used to communicate messages about upcoming WDT events and other WDT information. The message center also would be used to communicate community messages on behalf of the Rapid City Area Chamber of Commerce and the Visitor and Convention Center.

We appreciate the City of Rapid City's consideration of this request, and we respectfully ask for approval.
