Project Engineer

Re: Rapid River Subdivision Sanitary Sewer Extension
#SS06-1587

Engineering Services is requesting a review by the city Planning Commission of the above referenced project which will provide an extension of the municipal sanitary sewer system. Upon completion, this project will allow for sewer service to be provided to 2020 Jackson Boulevard in accordance with current city standards and permit abandonment of the existing non-compliant and failing service to that property. The project will also facilitate future extension of public sewer to the east which would allow service connections to several properties on the east side of Jackson Boulevard to be accomplished in accordance with current city specifications.
