RE: Planned Development and Final Planned Development

A patio, 28' X 12', was added to the south side of Piesano's Pacchia INC. This patio is a seasonal extension of the inside seating area. The current inside seating capacity is 48; the addition of the patio added another 16-18 available seats. There is a wood fence around the patio so beer and wine can be served outside.

This area can also be used as a waiting area for customers who prefer inside eating.
