**LETTER OF INTENT FOR
11-6-19 – EASY STREET SANITARY SEWER EXTENSION
PROJECT: SS09-1829 / CIP50776**

The City of Rapid City has received two grants from the US Environmental Protection Agency (EPA) for the combined amount of \$890,700.00. The intent of the grants is to protect the quality and sustainability of our water supply, namely through the extension of sanitary sewer mains and reduction of on-site wastewater systems. Easy Street, the Cliff Drive area, and Heights Drive area have been identified as priority locations in the Source Water Protection Report completed for the City by Stanley Consultants in 2009.

Dream Design International has been selected to provide the engineering services for this submittal. This submittal relates specifically to Easy Street. A new 8" sanitary sewer main will connect to an existing manhole located at the intersection of Corral Drive and Easy Street. Approximately 1200 feet of new sewer main will be constructed. The existing gravel road will be replaced following the construction of the sewer main.
