

To whom it may concern,

We are proposing to remove an existing mobile home, and replacing it with a new 28 wide by 50 long mobile home. The new home will be affixed to a permanent pier type foundation as approved by SDHA, and HUD. We are going to replace the existing water line, because of past failures, but we are going to leave the existing sewer. We also are planning a hard surface driveway, along with a gravel surface to parallel for RV parking. Most of the landscape features will remain untouched other than the layout of the driveway.

Sincerely,

Ken and Renee Rose
