

LETTER OF INTENT FOR MEADOWLARK HILLS MOBILE ESTATES PLANNED DEVELOPMENT

The legal description for the Meadowlark Hills Mobile Estates Planned Development is on sheet 1. An Initial Planned Development is requested for the Unplatted Area which is indicated as Phase 3. A Final Planned Development is requested for those portions of the site that currently exist and for the Phase 1 and Phase 2 Expansions.

Nearly all of Meadowlark Hills Mobile Estates currently exists. The existing portions were constructed to the standards that existing at the time those portions were constructed.

Future Phase 1, Phase 2, and Phase 3 expansion areas are also proposed as indicated on the drawings. It is anticipated that Phase 1 will be constructed in 2013/2014. It is anticipated that Phase 2 will be constructed within 5 years. It is currently unknown when Phase 3 will be constructed.

It is noted that in some case manufactured homes exist or are proposed over existing lot lines. A Developmental Lot Agreement will be requested to allow this. There are no platted drainage and utility easements on these lot lines.

It is intended that the project shall comply with Chapters 15.48.080 and 17.50.110 of the Rapid City Municipal Code unless otherwise noted in this letter of intent.

EXISTING MANUFACTURED HOMES

It is intended that all existing manufactured homes shall be considered as legal nonconforming uses until such time as they are replaced, expanded, or relocated at which time the manufactured home on the subject lot shall be made conforming.

CLEARANCES

The following minimum clearances for manufactured home units as outlined in the current City Code 15.48.080 shall apply. No variances or exceptions are requested for the clearances and the following table from 15.48.080 is included for reference only.

Front clearance from interior park road edge: 5 feet

Side clearance from any manufactured home and any enclosed appurtenances to any other manufactured home and any enclosed appurtenances: 20 feet

May be reduced to 10 feet if both structures meet the NFPA standards for fire sprinkler protection.

End clearance from any manufactured home and any enclosed appurtenances to any other manufactured home and any enclosed appurtenances: 10 feet

Deck to any other deck on a separate manufactured home space: 5 feet

Carport to adjacent deck on a separate manufactured home space: 5 feet

Carport to adjacent carport on a separate manufactured home space: 5 feet

Carport or deck to manufactured home on the same manufactured home space: 0 feet

Carport to manufactured home on a separate manufactured home space: 10 feet

Shed or playhouse to any other shed or playhouse on a separate manufactured home space: 5 feet

Any building, structure, or addition thereto, not listed shall have clearances as mandated by the current adopted building code for fire separation distance.

SETBACKS FROM RIGHT OF WAY OR PROPERTY LINES

Due to the changing nature of the manufactured housing industry, it is no longer possible to place mobile homes on lots that require 25' setbacks. As such, reduced setbacks are proposed for various lots as illustrated on the drawings and as outlined on the Reduced Setback Table. Reduced setbacks are justified because:

- * Mobile homes have grown in size over the years and are needed to provide affordable housing,
- * The right of way width for East Adams Street, East Van Buren Street and North Spruce Avenue is 80' compared to the 52' width that would be allowed if these streets were being platted today,
- * 15' setback is judged as a reasonable setback from Lacrosse Street for a mobile home park,
- * 0' setback is judged as a reasonable setback from the railroad right of way for a mobile home park and this setback request is supported by the railroad company,
- * 10' setback from a public park is judged reasonable due to the overall layout of the mobile home lots and public park,
- * Adequate sight distance is available for vehicle turning movements at public street intersections as shown on the Sight Distance drawing; however, new stop signs are proposed at the Robin Lane/East Van Buren/Pheasant Lane intersection even though the sight distance issue at that location is not related to setbacks.
- * Certain shrubs are being removed as shown on the drawings even though those shrubs are not related to reduced setbacks. These removals are needed for sight distance even if setbacks are not reduced.
