Public Works Committee/Council

RE: Request Authorization to Seek Proposals for Engineering Services for Project SSW04-1263 – Tallent Street Water Main Reconstruction, CIP #50358

Staff proposes to re-construct a portion of Tallent Street from just east of Elm Avenue to East Meade Street in order to replace an undersized, aging, and failing water main. Portions of this project will also require replacement of the aging and failing sewer main while other portions may not require full sewer main replacement. Those portions where both water and sewer mains will be replaced will also include complete reconstruction of the street pavement section. Portions that do not require full demolition of the street pavement will be repaired and overlaid.

This project consists of 3,700 lineal feet of new 8" PVC water main, 1,090 lineal feet of new 8" PVC sewer main, new service lines and asphalt pavement or asphalt patch with an asphalt overlay.

Funding for this project is as follows:

Streets fund	#505 8910 4370	\$175,000.00
Drainage fund	#505 8911 4371	\$ 25,000.00
Sewer fund	#604 833 4380	\$120,000.00
Water fund	#602 933 4381	<u>\$215,000.00</u>
For a total budget (including design) of:		\$535,000.00

Staff proposes to bid and construct this project in 2004.

Joe Jagodzinski, PE
Project Manager
