NOTES:			
Priority Items 1 through 14 are based on projected projects through 2007. These locations have been shown to be cost effective.			
Priority Items 15 through 30 require a Cost/Benefit analysis. The analysis will be conducted during the project year.			
Priority Item 5 is not scheduled because this sewer section is in the Rapid Valley Sanitary District and an agreement would have to be reached with the District first.			
It is important to note that the project dates must remain fluid as some work may be completed with other projects. For example: Priority 20 could be completed if Jefferson Street was reconstructed. All the work would be done at the same time.			
Some priorities appear out of sequence because they may be tied to other projects.
