Public Works Committee/Common Council

RE: Request Authorization to Seek Proposals for Engineering Services for
St. Andrews Reconstruction – Phase 2. Project ST10-1803 CIP # 50714

Staff proposes to reconstruct St. Andrews Street from Lincoln Avenue to Elm Avenue. Project will include new sanitary sewer, storm sewer, new water main, curb & gutter, pavement and sidewalk. Most of the existing sanitary sewer is clay pipe. There is a 20" water transmission main along the north side of the street which will remain. A 8" PVC main will be built along the south side and water services will be switched to the 8" main.

Staff proposes to hire a Consultant to be responsible for designing the project, bidding the project, and providing construction observation, administration and project closeout.

The project is funded from the Street, Water, Sewer and Drainage funds. The project budget is \$515,000.

Staff proposes to bid and construct the project in year 2010.

Dale Tech, PE
City Engineer

Cc: Robert Ellis, Public Works Director
