Re: Request Authorization to Seek Proposals for West Boulevard Sanitary Sewer Reconstruction West Boulevard Project W11-1961 CIP No. 50794

This project is located in West Boulevard between Omaha Street and St. Joseph Street and in St. Joseph Street between West Boulevard and West Street.

The project includes reconstruction of the sewer mains, sewer service lines and disturbed pavement.

The project is needed to replace the sewer mains which are vitrified clay pipe and have reached the end of their useful life. The sanitary sewer mains have shallow grades, plugging problems, and are severely cracked causing severe infiltration and inflow.

Staff proposes to hire a Consultant Engineer to be responsible for designing the project, providing bidding services, and providing construction observation, administration, and project closeout.

The project is funded from the Sewer Enterprise Fund. The project is estimated to cost \$1,420,000 which includes design and construction costs.

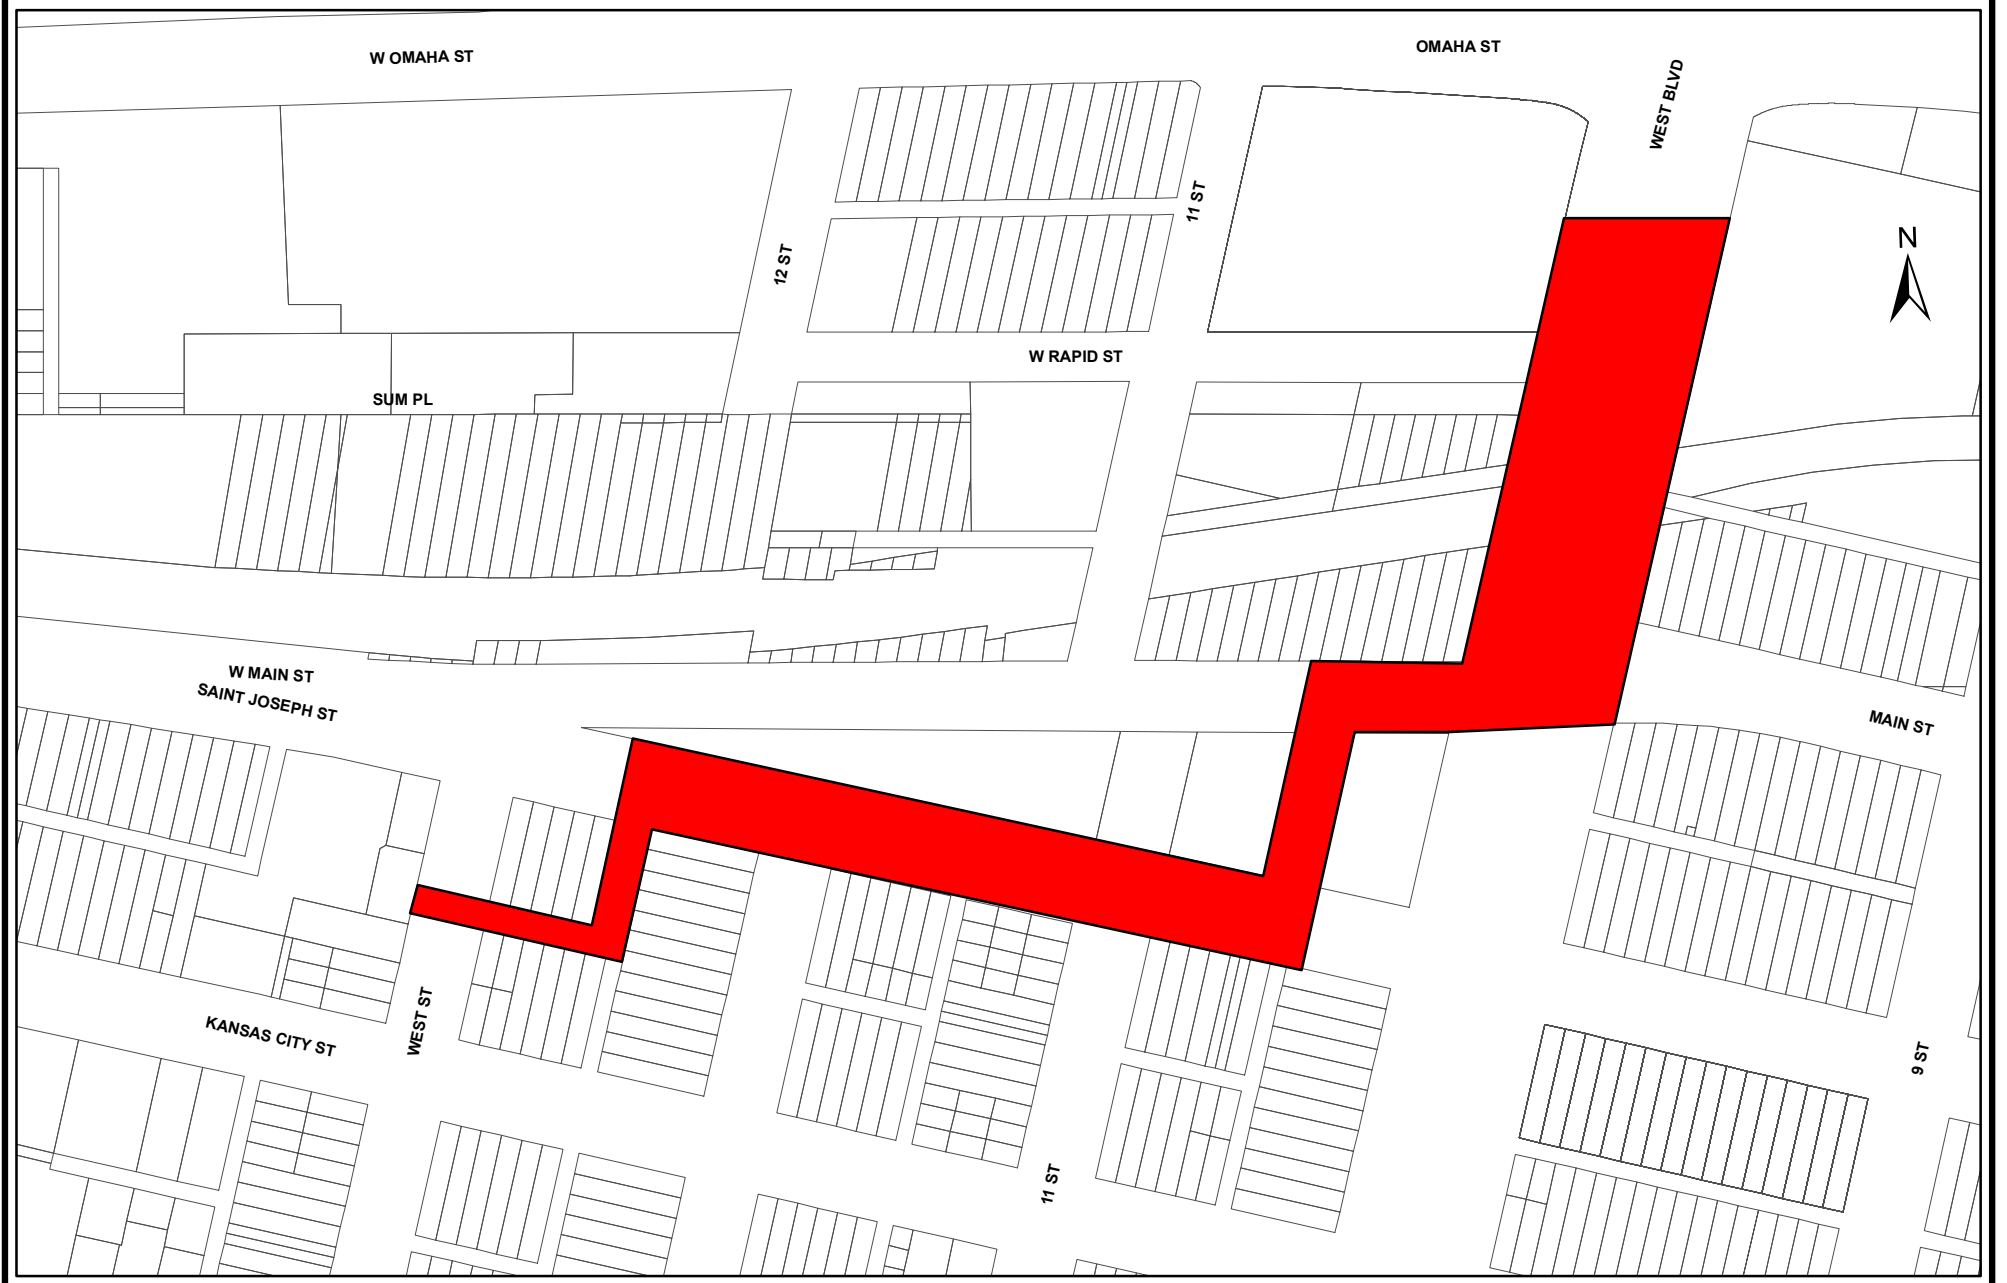

Staff proposes to bid and construct the project in 2012.

Dale Tech, PE
City Engineer
