Re: Request Authorization to Seek Proposals for West Chicago Street and Staton Place Reconstruction and Drainage Improvements Project 12-1187 CIP No. 50364

This project is located in West Chicago Street between Seeaire Street and Wedgewood Drive, and in Staton Place.

The project includes reconstruction of the streets, sanitary sewer and water mains, and the construction of drainage facilities.

The project is being proposed because the streets are in poor condition, the sanitary sewer and water mains have reached the end of their useful lives, and drainage improvements as recommended in the South Canyon/Lime Creek Drainage Basin Design Plan need to be constructed to alleviate localized flooding.

Staff proposes to hire a Consultant Engineer to be responsible for designing the project, providing bidding services, and providing construction observation, administration, and project closeout.

The project is funded from the Sewer Enterprise, Water Enterprise, Streets and Drainage Funds. The project is estimated to cost \$1,465,000 which includes design and construction costs.

Staff proposes to bid and construct the project in 2013.

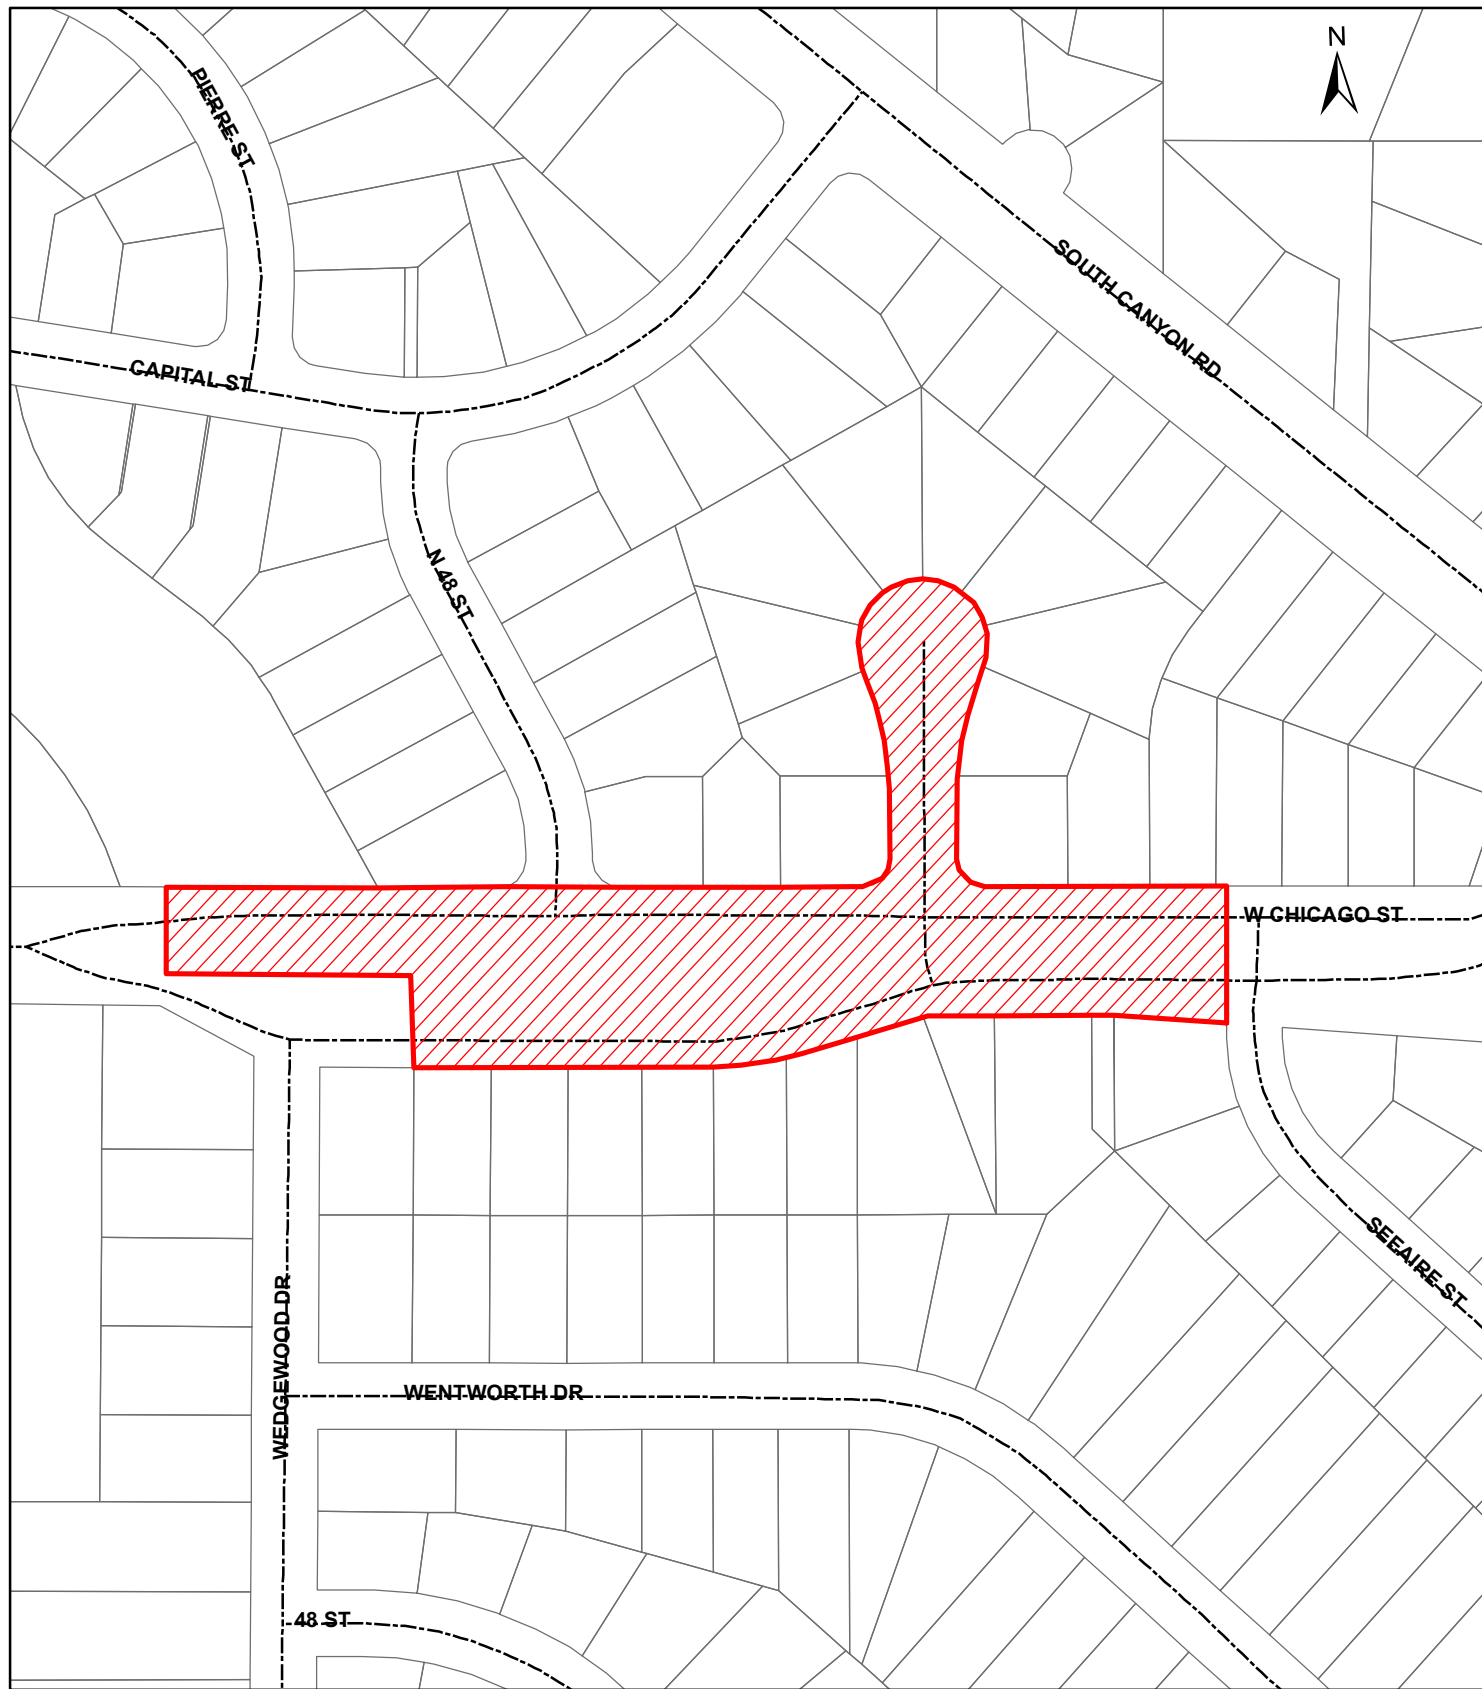

Dale Tech, PE
City Engineer
