MEMORANDUM

TO: Planning Commission

FROM: Kip Harrington, Transportation Planner

DATE: March 14, 2012

RE: No. 12TP004 Arterial Street Safety Study Final Report

Attached for your review and approval is the Arterial Street Safety Study Final Report. This report identifies the top ten arterial street segments with the highest critical crash rates determined by analyzing the past crash totals, daily traffic volumes and arterial segment lengths. The report also provides solutions with the greatest potential to improve arterial traffic safety for the top crash locations, including concept drawings on how to remedy the situation for the top ten arterial segments. The public was invited to an open house on November 15, 2011 to encourage discussion about the crash analysis and the recommended solutions. There were no significant changes between the Draft and Final Reports.

STAFF RECOMMENDATION: Staff recommends approval of the Arterial Street Safety Study Final Report.
