Re: Request Authorization to Seek Proposals for Engineering Services for the Silver Street Interchange Utilities Reconstruction Project, 12-2053 / CIP #50940

This project is the reconstruction of I-190 from Rapid Creek to Van Buren Street and will include street and utility work in Philadelphia Street, Silver Street, West Boulevard and North Street. The project will include replacing water and sewer mains through the corridor, possible over-sizing of the proposed storm sewer system to meet City criteria, and a water quality pond.

Staff proposes to hire a Consultant to design the water and sewer mains within the project area, review the design of storm sewer and side streets by SDDOT for compliance with City requirements and design the water quality pond to be included with the SDDOT project.

The project is funded from the Water Enterprise, Sewer Enterprise, CIP Streets and CIP Drainage funds. The project is estimated to cost \$1,400,000 which includes design and construction costs.

Staff proposes to bid and construct the project in conjunction with the SDDOT project in 2015.

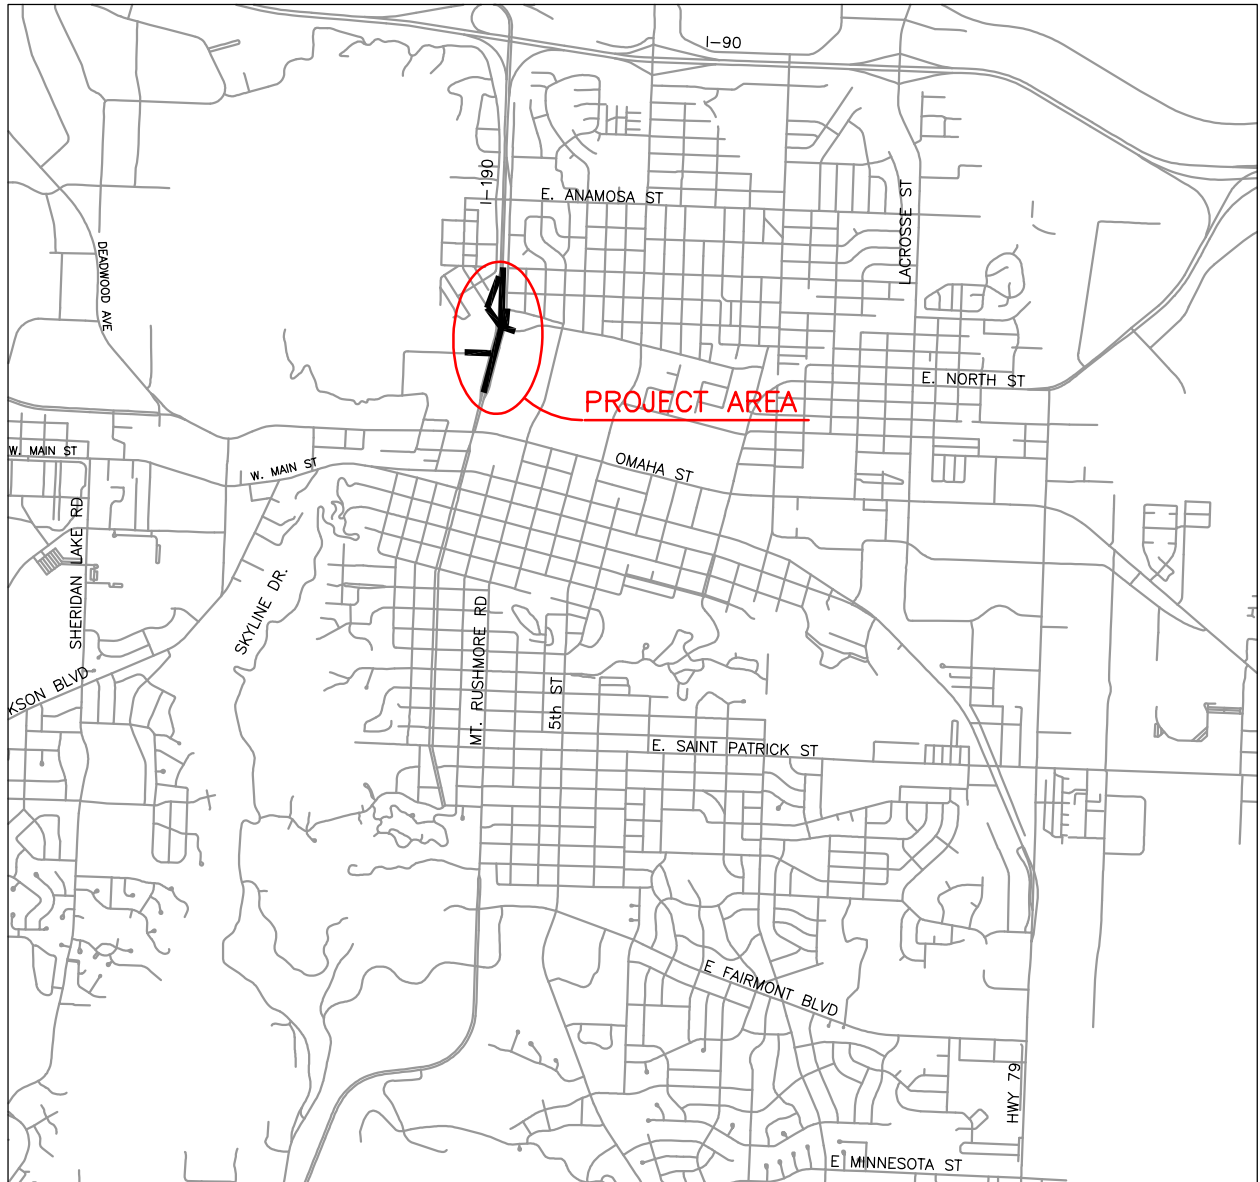

Dale Tech, PE/LS
City Engineer
