Public Works Committee/Common Council

RE: Request Authorization to Seek Proposals for Engineering Services for  
Omaha Street Utilities – Sheffer St. to 12<sup>th</sup> St. Project No. 16-2099 CIP No. 50904

Staff proposes to reconstruct utilities within the Omaha Street corridor between Sheffer Street and 12<sup>th</sup> Street in conjunction with the SDDOT reconstruction project proposed for 2016. A number of storm sewer crossings need to be upsized and reconstructed along with water quality features at the outfall locations. In addition, water mains and sanitary sewer mains in the corridor need to be replaced with larger diameter PVC mains.

Staff proposes to hire a Consultant to be responsible for designing the project, bidding the project, and providing construction observation, administration and project closeout. The consultant is being hired at this time to provide coordination between several projects that have design elements that will affect this project.

The project is funded from the Water, Sewer Streets and Drainage funds. The project budget is approximately \$800,000.

Staff proposes to bid and construct most of the project in conjunction with the SDDOT surfacing project scheduled for 2016. A portion of the project may be done ahead of the SDDOT project.
