Public Works Committee/Common Council

RE: Request Authorization to Seek Proposals for Engineering Services for  
Water and Sewer Expansion Projects, Project No. 13-2100 CIP No. 50961

Staff proposes to extend water and sewer mains in several areas throughout the City to eliminate non-conforming service lines.

Several projects have been requested through the non-conforming service line program initiated by the City in 2009. Staff proposes to hire a Consultant to prepare design plans, provide property owner coordination and assist with the bidding of nine separate projects.

The project is funded from the Water and Sewer funds and included City matching funds. The City will recoup a portion of the project costs through assessments and construction fees. The project budget is approximately \$680,000.

Dale Tech, PE  
City Engineer
