Subject: Lazy P6 Design Exception Denial

Hi

Lazy P6 would like this placed on the next available PWC agenda.

They have several questions, including when did DE requests become like rezoning - neighbors get to object? The neighbor objects to P6 giving them the latitude to set an H/V for Elm that is acceptable to them?

Also, could one of you copy the Elm St WORP that accompanied the original Gemstone Plat and link it to the PWC item? Also, a snapshot of the MSP in this area that shows Elm St north well off the property line.

P6 wants you to confirm that the request was for Sandra, which is not on the adjoining property at all.

Please call with questions and advise of scheduling progress. Thanks.
