

Explanation of changes to the fee schedule for Grave Spaces

1. Grave Space Costs Pre-need
 - a. Family Section- price increase was needed due to larger spaces to accommodate the larger space of land needed for the monuments.
 - b. Infant Grave, Small Child- price was deleted in the pre-need category as these graves are only bought on an as-need basis. Also note the name change from oversized infant to small child. This just sounds better.
 - c. County Grave- These graves are only bought on an as need basis. Also note that this item was added so you can see the different prices involved.

2. Grave Space Costs As-need
 - a. Infant Grave- I did not increase the price on the infant graves. Due to the hardship involved with these burials.
 - b. Small Child- These graves are larger and need to go out with the regular graves. To give a small break in price I started with the pre-need price of the adult graves.
 - c. County Grave- There is no tax listed as the county buys these graves and they don't pay tax.

3. Opening and Closing Costs
 - a. Infant- I also left the price the same here
 - b. Cremation Other- This was created for cremations dug other than the standard size. Special requests.
