Public Works Committee/Common Council

RE: Request Authorization to Seek Proposals for Engineering Services for
Cobalt Drive Sanitary Sewer Bypass, Project No. 14-2127 / CIP No. 50957

This project is for the construction of a bypass sanitary sewer main and appurtenances between the intersection of Auburn Drive and Haines Avenue and the western terminus of Cobalt Drive within the Brookfield Subdivision. This bypass sewer will redirect a significant amount of flow that is currently routed through a sanitary sewer main on Viking Drive.

This bypass is proposed because the Viking Drive sanitary sewer main is near capacity and is expected to exceed capacity in two to three years, given the current level of development.

Staff proposes hiring a consultant. The consultant will be responsible for the project design, acquiring easements, bidding the project, providing construction observation, administration and project closeout.

This project is funded from the Sewer .16 Facilities Fund; 0831. Based on the current information, the project cost is estimated to be \$530,000.00. Staff proposes to bid the project in 2014.

Dale Tech, PE
City Engineer
