Re: Oversize Request for Discovery Subdivision

Dear Mrs. Lecy,

I formally request on behalf of Discovery Circle, LLC that the oversize agreement for the request detailed below be considered and approved consistent with our discussions that occurred during the Development Engineering Plan process. The owners have a potential buyer that would like to close on a lot within the subdivision as soon as possible. I would also like to ask that the final plating of the subdivision be allowed to proceed and be finalized as the agreement is being completed. Please see the oversize request below in accordance with the Rapid City, SD Code of Ordinances, Chapter 16.16.100.

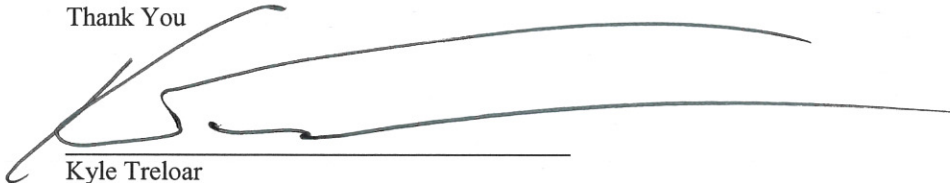

1. 30" RCP Casing Oversize Request

The developer is requesting \$41,620.80 to construct two 30" RCP Casings beneath Discovery Circle. The RCP casing pipes were requested by the City of Rapid City to facilitate the installation of a future force main upgrade.

The unit bid price for the 30" RCP Casing is \$86.71, as bid by Lind Exco Inc. The total installed length will be 480LF. The total price for the 30" RCP casing pipes is \$41,620.80.

If you have any question or need any additional information please contact the office.

Thank You
