Re: Request Authorization to Negotiate Professional Consultant Services with Geiger Architecture for Rapid Transit Bus Storage Addition

The City of Rapid City is preparing to construct an addition to the Rapid Transit Bus Storage Facility on Center Street. The total budget for the project is \$1,000,000, which includes \$800,000 in Federal Transit Authority funding and \$200,000 in City match.

The City is requesting authorization to negotiate a Professional Consultant Services Contract with Geiger Architecture for this project. Geiger Architecture provided the consulting services for the original bus storage facility, which was a renovation of an existing commercial building. They are familiar with the facility and can expedite the design of this addition.

Match funding has been identified in the CIP Match Funds Budget.
