Based on the information provided, no guarantee and/or warranty is made concerning the performance of the equipment or the results to be obtained from its use. Future field conditions will determine the actual performance of the equipment.

The lighting patterns represent luminaire levels calculated from laboratory data taken under controlled conditions utilizing current industry standard test methods. Actual field performance may vary due to variations in electrical voltage, temperature, or the manufacturer's inherent design factors. Actual field performance may vary due to variations in electrical voltage, temperature, or the manufacturer's inherent design factors.
