Re: Request Authorization to Seek Proposals for Engineering Services for East St. Joseph Street Overlay and Watermain Reconstruction Project W11-1908 CIP No. 50801

This project is located in East St. Joseph Street between Steele Avenue and East St. Patrick Street.

The project includes reconstruction of the water main and milling and asphalt overlaying the street.

The project is needed to replace the water main which is undersized, in poor condition and has reached the end of its useful life. The street surface is deteriorating and rutted and is in need of an overlay.

Staff proposes to hire a Consultant Engineer to be responsible for designing the project, providing bidding services, and providing construction observation, administration, and project closeout.

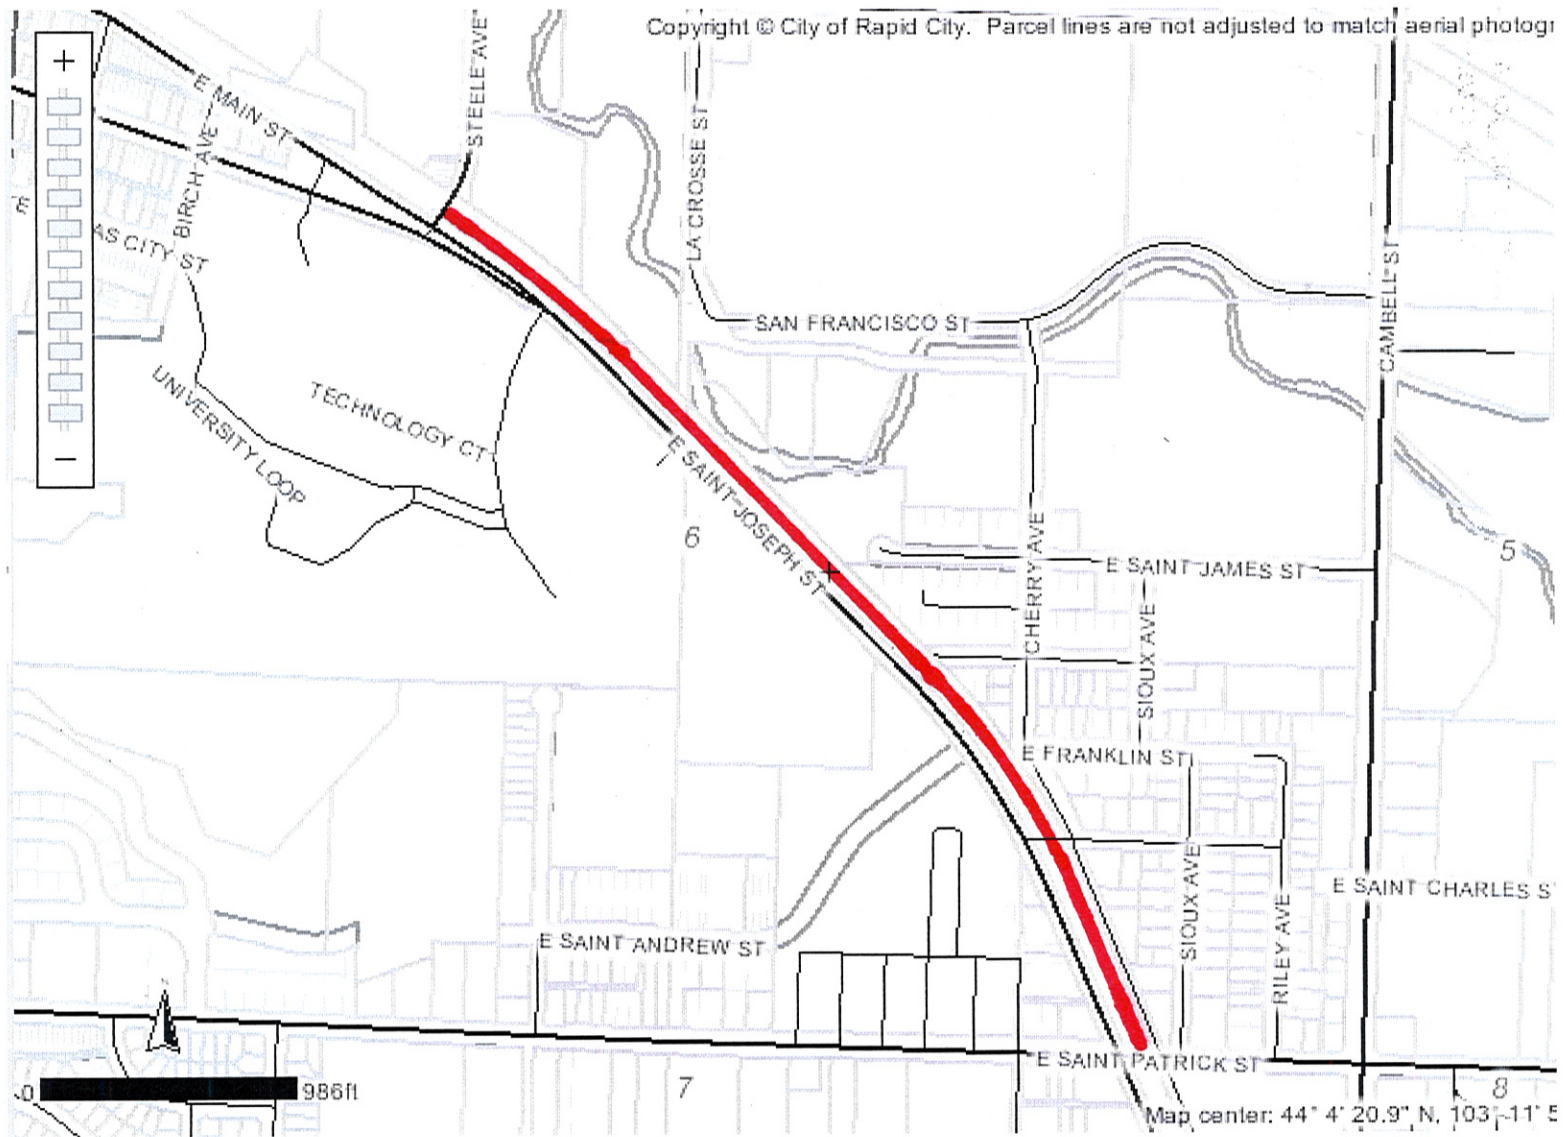

The project is funded from the Water Enterprise and Street Funds. The project is estimated to cost \$1,350,000 which includes design and construction costs.

Staff proposes to bid and construct the project in 2012.

Dale Tech, PE
City Engineer
