The Following Change Shall Be Made:

- Zuercher Technologies and Pennington County Sheriff's Office have agreed to treat SOW #41 as a Feature Request and not a Go Live Product Enhancement in exchange for adding Schedule Recurring Jail Inmates Activities as a BPR Request and a Go Live Product Enhancement.
 - **No Longer required for Go Live (Feature Request):**
 - SOW 41: ledsJail activities will be enhanced to allow administrators to restrict which activity types users can see.
 - **Required Go Live (BPR Request):**
 - The ability to schedule recurring jail inmate activities such as work release, school release, job search, inmate programs, trustee assignments, and any other inmate activity types will be added. This will support scheduling recurring activities using the following methods:
 - **Daily:** User specifies the activity time, frequency (every X days), start date, and ending parameters (options include ending by a specified date, ending after X occurrences, and no specified end date).
 - **Weekly:** User specifies the activity time, days of the week, frequency (every X weeks), start date, and ending parameters (options include ending by a specified date, ending after X occurrences, and no specified end date).
 - **Monthly:** User specifies the activity time, frequency (every X day of every Y month), start date, and ending parameters (options include ending by a specified date, ending after X occurrences, and no specified end date).

- Custom: User specifies individual dates and times for multiple occurrences. This is useful for an inmate who requires an irregular schedule on multiple activities such as a work schedule.

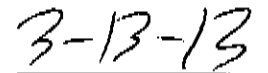

Agency Sign Off

I (we) certify the change outlined above is accurate and successfully reflects our request as is not considered a part of the project scope for Go Live.
