Re: 5TH Street Crossing
Project # ST09-1764 / CIP No. 50750

RECEIVED

AUG 17 2009

Rapid City Growth
Management Department

This memo is to provide information on the scope of work proposed under the referenced project.

The proposed Project will relocate the existing pedestrian crossing located near the hospital on 5th Street. The new location will be approximately 80' south of the existing location, and will include a raised island in the center turn lane. In addition, a signal with mast arms and one-section signal lights will be installed. As a result of the new location, modifications to the Black Hills Pediatrics driveway and the driveway just north of Black Hills Pediatrics will be required, and is included with the project. The Black Hills Pediatrics driveway will be widened to allow a dedicated left turn lane leaving the property. The second driveway, located on the Hospital property, will be reconfigured with an island to prevent northbound traffic on 5th street from entering. This northbound traffic will use the Black Hills Pediatrics driveway and a proposed road connection between the Hospital property and Black Hills Pediatrics property. This road connection between properties will be part of this Project.

Construction is expected to be completed by December.

Please let me know if there are any questions or additional information is needed.
