Subject: lage developement corral dr

Robert...

i am against the planned development on corral drive for several reasons..

- 1.. the hill is quite steep there and the access off of corral is at a sweeping corner
2. the road runs east/west and sunlight would be a hazard with cars accessing corral drive from the proposed units
3. there is already too much traffic on corral with the stop sign installed at park dr/corral dr...we now have to stop on corral drive at park drive even though the school traffic is busy at best twice a day, the buses servicing the school also use an access to corral directly below the access to the proposed driveway to the development.. making it dangerous in winter conditons
4. the traffic associated with more housing there including garbage, delivery vehicles, mail would also be a hazard...
5. i am opposed to the permit
