Restroom Description

Proposed:

The proposed project is to add an often requested restroom at the newly opened Legacy Commons at memorial Park in Rapid City. The proposed restroom will have two toilets on the women's side, one toilet and one urinal on the men's side, double sinks and diaper changing units. The restrooms are ADA accessible, including an accessible route from the bike path. The exterior will be masonry units and the interior mostly tiled. A 12 foot depth shelter covers the full width of the front of the building.
