City of Rapid City
Public Works Committee and Council

RE: Request permission to seek Consultant Services for 44th Street
Reconstruction, West Chicago to West Main, Project ST05-1435.

The City of Rapid City proposes to re-construct portions of 44th Street from just south of West Chicago Street to the south side of the West Main Street and 44th Street intersection. The project is scheduled for construction in 2008. See the attached maps of project area/limits, provided specifically for this RFP.

The work on this project will include installation of a large box culvert under the West Main and 44th Intersection. The work would further include new water, sewer, storm sewer, curb and gutter, sidewalk and pavement. The work on this project may also include a realignment of South Canyon Road to convert the southeast leg of the 44th Street and West Chicago intersection to a cul-de-sac. The work will also include and extension of Grays Drive to South Canyon, requiring acquisition of R.O.W.

The project currently has a total budget of \$730,000.00, including design, construction, inspection, easement exhibits and property acquisition. Funding for the project is, currently, from the 933 Water Enterprise Fund, the 833 Sewer Enterprise Fund, the 8910 Streets Fund and the 8911 Storm Sewer fund. Additional funding may be necessary to complete the Grays Drive portion of this project.

Respectfully,

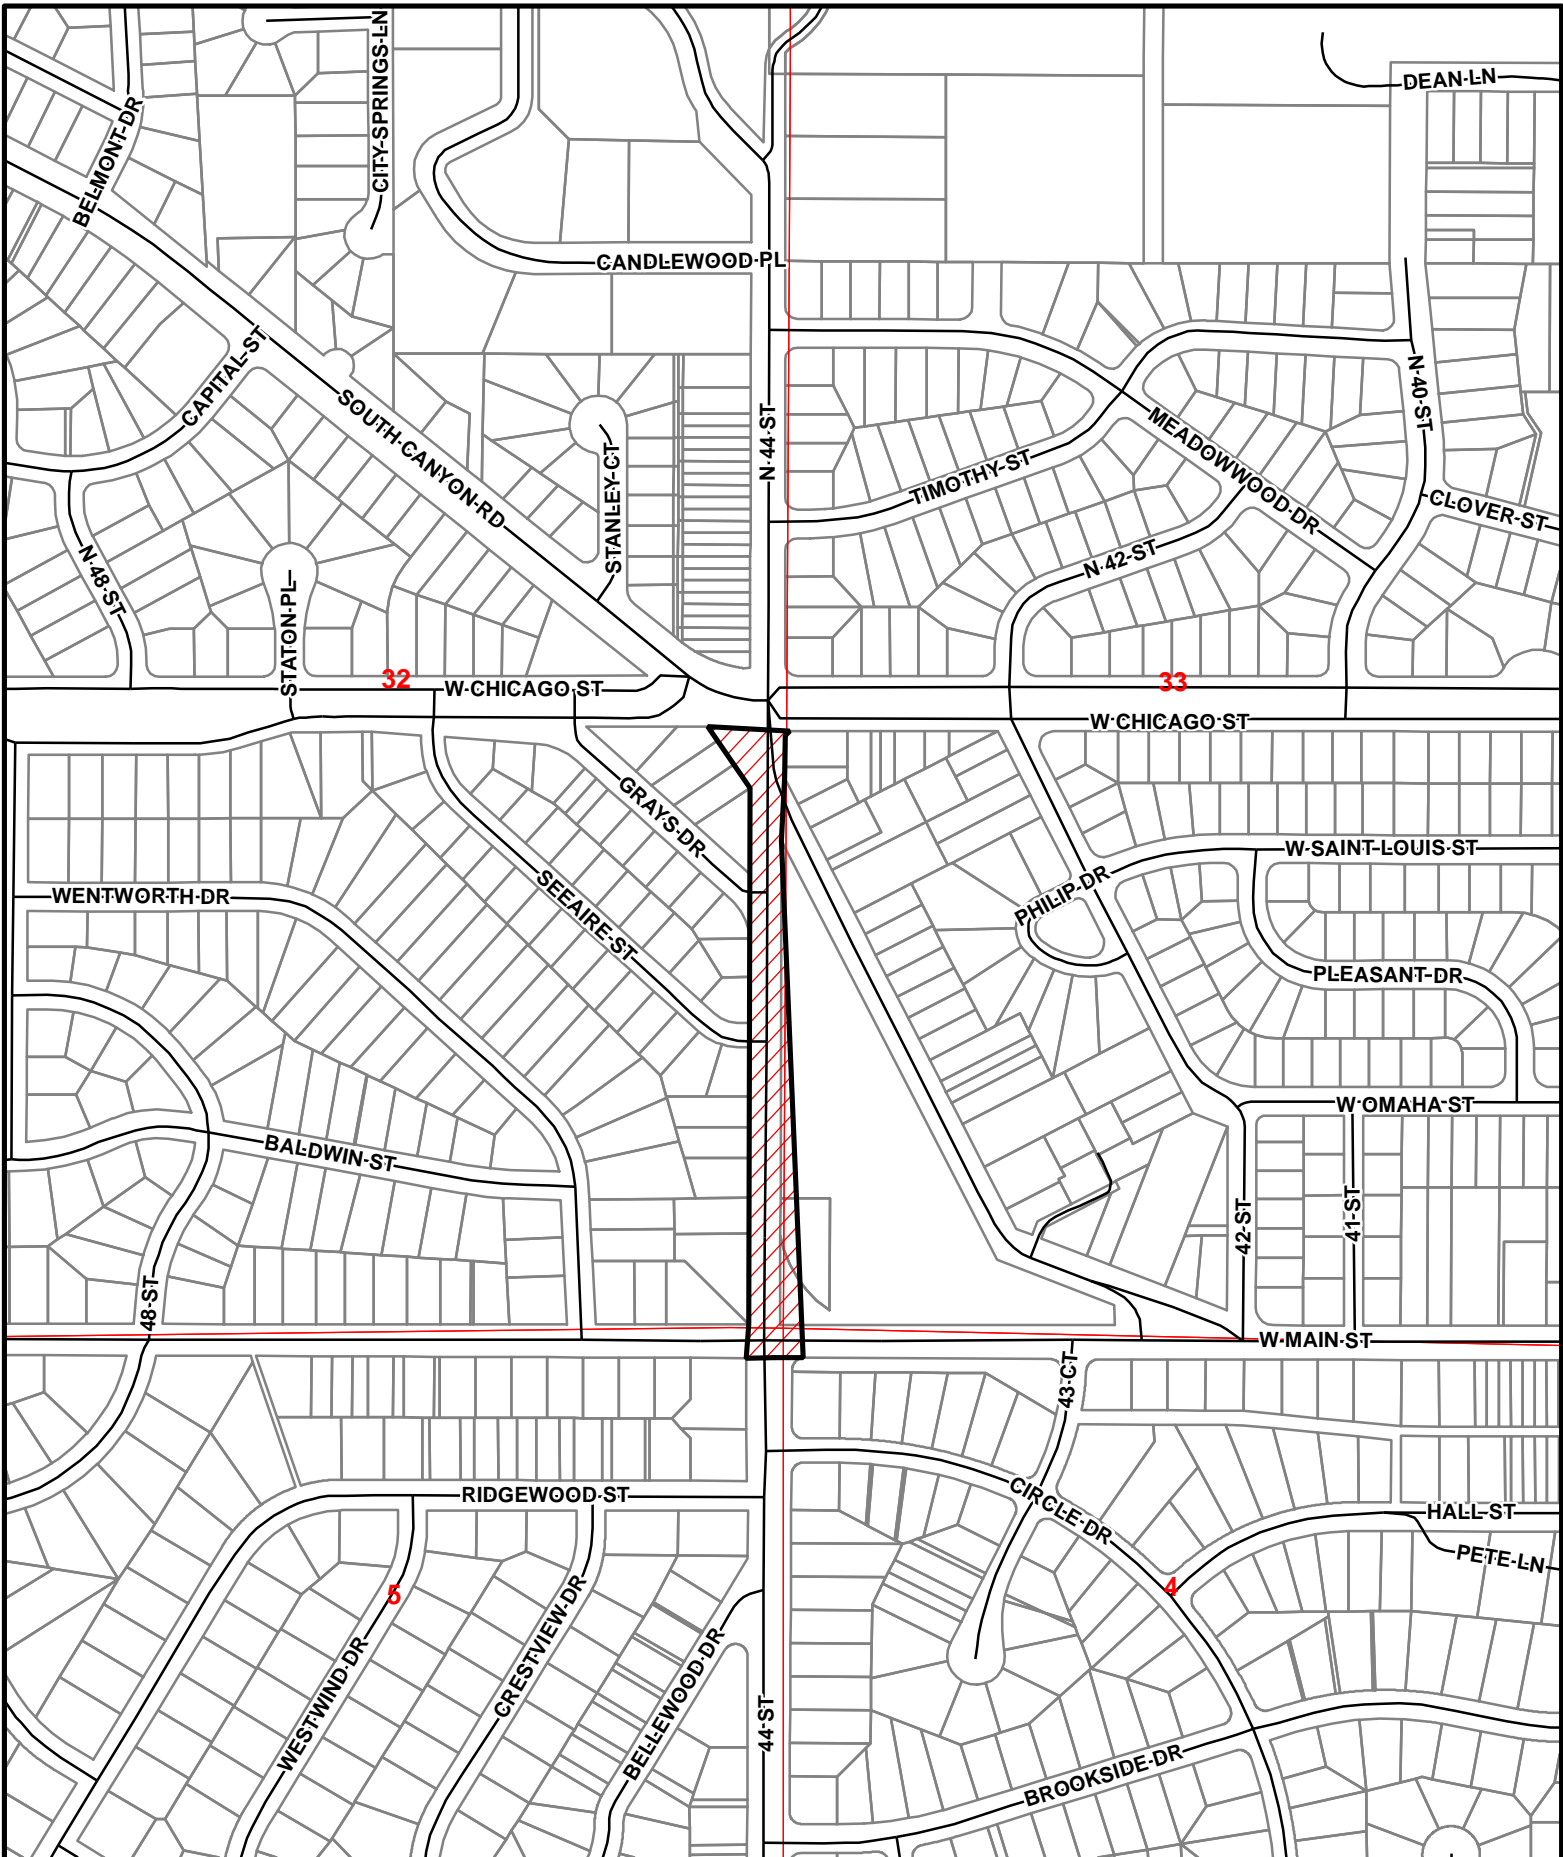

Joe Jagodzinski, P.E.
