Public Works Committee/Common Council

RE: Request Authorization to Seek Proposals for Engineering Services for
Allen Avenue Alley Sewer Reconstruction Project SS08-1710 CIP # 50419 and
Blaine, Halley, Holcomb, E. Jackson and N. Maple Sewer Reconstruction
Project SS08-1711 CIP #50420

Staff proposes to reconstruct the existing sanitary sewer mains. Blaine Ave. will be milled and asphalt overlaid. The existing sewer mains are in poor condition because of root intrusion, sags and cracking. The streets are in a deteriorated state and the asphalt overlay will extend their useful life. The projects also include two small water main loops that are needed to improve the water system.

Staff proposes to hire a Consultant Engineer to be responsible for designing the projects, bidding the projects, and providing construction observation, administration and project closeout.

The projects are funded from the Sewer Enterprise Fund and Street Improvements Fund. The projects' budget is \$777,000, which includes design and construction costs.

Staff proposes to bid and construct Project SS08-1710 in 2008, and bid Project SS08-1711 in 2008 with construction to follow in 2009.
