Public Works 2008 file

Please find attached the documents to initiate permission to advertise for one new yard waste turning machine and one new yard waste screening plant. In addition we are asking for permission to apply for a State Solid Waste Grant to assist in the purchase of this equipment. The two yard waste equipment items are budgeted with the State Grant Program as part of the funding. Bids will not be advertised until after receipt of the grant by the South Dakota Solid Waste Grant Program.

Department 7102 Landfill Operations

Purchase of yard waste processing screen and windrow turner is to replace equipment purchased in the 1993-1994 era. This equipment needs replacement for wear and tear, but also to increase productivity of an ever growing system. The total cost is estimated at \$660,000, with \$330,000 from the budget and an estimated \$330,000 from the state solid waste grant program.

Formal approval by the City Council to apply for the State Grant is requested and the grant application document is attached for action. This grant application is for the above discussed yard waste processing equipment.
